

# Next Steps

## Design Changes

- Home Screen
  - Prompt user at the beginning to set preferences for customized list of events
  - Differentiate home screen from search screen
- Search Screen
  - Design another search screen with filters on it
  - Conduct A/B test to compare with current search screen
- Confirmed Attendance Screen
  - Change layout of Confirmed Attendance Screen
  - Or, create two screens (one asking to confirm attendance, another showing receipt of confirmation + asking for event buddy pairing)
